PROFILE

Backend Engineer with **4+ years** of experience designing, scaling, and deploying resilient web architectures and microservices using **Python, Django, DRF, PostgreSQL, and AWS**. AWS Certified Solutions Architect with proven end-to-end ownership in API design, asynchronous processing (Celery/Redis), ORM query optimization, secure authentication (JWT/RBAC), and containerized CI/CD deployments. Experienced in integrating GenAI/RAG pipelines, OpenAI APIs, and payment gateways into high-availability production environments.

PROFESSIONAL EXPERIENCE

Associate Software Engineer 03/2022 – Present
AimedAt Solutions PVT LTD Bengaluru

RoninFC (Combat Sports & Athlete Management Platform):
- Served as **Primary Backend Owner** leading platform design from requirements to deployment.
- Engineered REST APIs for athlete onboarding, coach management, event registration, and automated tournament scheduling.
- Integrated **Razorpay payment gateway** with webhook handlers for subscriptions and media management using **AWS S3**.

MHealth (Healthcare Platform for Pregnant Women):
- Designed healthcare APIs for doctor-patient scheduling, medical metric tracking, and lab report processing.
- Developed custom algorithm workflows for personalized dynamic diet recommendations.
- Built automated reminder task queues using **Celery & Redis**.

CMDC (Cloud Hosting & Domain Reseller Platform):
- Developed domain management and cloud hosting backend services.
- Refactored Django serializers and optimized ORM relationships to improve API throughput.
- Built background job queues using **Celery** for automated domain provisioning.

Indina E-Commerce Platform:
- Built backend microservices for product catalogs, user carts, order execution, and checkout flows.
- Configured secure authentication APIs (JWT, OTP, RBAC) and third-party payment gateways.

Core Platform Optimization & DevOps (Across All Products):
- Tuned PostgreSQL ORM queries and indexing, dropping p99 response times from **1.2s to <180ms** across high-traffic endpoints.
- Reduced main-thread latency by **40%** by offloading asynchronous background tasks to Celery/Redis queues.
- Deployed microservices using **AWS (EC2, S3), Docker, Nginx, Gunicorn, and GitHub Actions CI/CD** with 99.9% uptime.

Freelance Frontend Developer (Contract) 11/2024 – 03/2025
KMA Labs Virginia, USA

- Developed a mobile-first, responsive service marketplace web application using **React.js, HTML5, and CSS3**, increasing mobile user engagement by 25%.
- Built reusable UI components and integrated state management with backend **RESTful APIs** for dynamic data fetching.
- Optimized cross-browser compatibility, bundle sizes, and performance metrics to achieve top-tier Lighthouse audit scores.

Tech Stack: React.js • JavaScript • HTML5 • CSS3 • REST APIs • Git

EDUCATION

Master Of Computer Application 10/2021
Sambhram Academy of Management Studies, Bangalore City University Bangalore

Bachelor Of Computer Application 05/2019
SJPNTrust's BCA College Nidasoshi, RCU University Belagavi

SKILLS

Languages & Core:
Python, JavaScript, SQL (PostgreSQL, MySQL, SQLite)

Distributed Systems & Async:
Celery, Redis, Asynchronous Task Queues, Message Brokers, Webhooks

Databases & Security:
PostgreSQL, Schema Design, Query Optimization/Indexing, JWT, RBAC, OTP, Swagger/OpenAPI

Third-Party Integrations:
Razorpay, Payment Gateways, Webhooks, Third-Party REST APIs

Architecture & Leadership:
System Design, Microservices, Technical Documentation, Code Reviews, Developer Mentoring, Agile/Scrum

Backend Frameworks :
Django, Django REST Framework (DRF), FastAPI, RESTful APIs, System Design, Microservices

Cloud & DevOps:
AWS (EC2, S3, IAM), Docker, GitHub Actions CI/CD, Nginx, Gunicorn, Linux, Git, Jenkins, GitLab CI, DigitalOcean, Lambda, CloudWatch, Boto3, Kubernetes, Amazon EKS, Terraform, AWS CloudFormation

AI & Automation:
Generative AI, OpenAI API, Retrieval-Augmented Generation (RAG), AI Agents, LangGraph, MCP, Prompt Engineering, n8n Workflows

Identity & Access Management (IAM):
Authentication, Authorization, Role-Based Access Control (RBAC), JWT, OAuth 2.0, OpenID Connect (OIDC), SAML, Single Sign-On (SSO)

CERTIFICATES

- AWS Certified Solutions Architect Associate (SAA-C03)
- Building AI Agents & Chatbots with LangGraph
- AWS Certified Cloud Practitioner (CLF-C02)
- Prompt Engineering for Generative AI

LANGUAGES

- English
- Kannada
- Hindi
- Marathi

AI & INDEPENDENT ENGINEERING PROJECTS

AI Agent & RAG Pipeline Suite (GenAI / Automation)
- **Tech Stack:** Python, OpenAI API, LangGraph, RAG, Vector Databases, FastApi / Django, n8n, MCP
- Engineered custom **Retrieval-Augmented Generation (RAG) pipelines** using OpenAI APIs to query unstructured documents and return contextualized answers.
- Built autonomous **AI Agents using LangGraph** and Model Context Protocol (MCP) concepts to perform multi-step decision workflows and automated actions.
- Integrated **n8n workflow automation** to connect custom backend APIs with LLM processing queues.
