PROFILE

AI Engineer and Python Backend Developer with **4+ years** of experience building backend systems and AI-powered applications. Experienced in developing intelligent solutions using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI agents, automation workflows, and Python-based backend architectures.
Strong expertise in Python, Django, FastAPI, REST APIs, database systems, cloud deployment, and integrating AI capabilities into real-world applications.
Hands-on experience designing AI assistants, prompt-based systems, knowledge retrieval pipelines, and automation workflows using modern AI technologies.
Passionate about creating practical AI solutions that improve productivity, decision-making, and business processes.

SKILLS

Programming Languages :
Python, SQL, JavaScript

Generative AI / Machine Learning :
Generative AI Applications,Large Language Models (LLMs), OpenAI API, Prompt Engineering, AI Agents, Agent Workflows, Retrieval, Augmented Generation (RAG), Embeddings, Vector Search,Context Management, AI Automation

AI Technologies:
LangChain, LangGraph, ChromaDB, Pinecone, Milvus, AI Workflow Automation, n8n

Backend Development :
Python, Django, Django REST Framework, FastAPI, Flask, REST APIs, Microservices, API Integration, Authentication Systems, Background Processing

Databases :
PostgreSQL, MySQL SQLite, Elasticsearch, Vector Databases

Cloud & DevOps :
AWS EC2, AWS S3, AWS IAM, AWS Lambda Basics, DigitalOcean, Docker, Docker Compose, Linux, Nginx, Gunicorn, CI/CD

Tools :
Git, GitHub, Postman, Swagger, VS Code, Jira

PROFESSIONAL EXPERIENCE

Associate Software Engineer - Python Backend & AI Developer 03/2022 – Present
AimedAt Solutions PVT LTD Bengaluru

- Developed scalable backend applications using Python and Django.
- Designed REST APIs for web and mobile applications.
- Integrated AI capabilities into applications using LLM APIs.
- Built AI-powered workflows using prompt engineering techniques.
- Developed backend services for intelligent applications.
- Designed database structures for AI and business applications.
- Implemented authentication, authorization, and security systems.
- Worked with cloud infrastructure and production deployments.
- Developed automation workflows to reduce repetitive manual tasks.

BACKEND PROJECT EXPERIENCE

MHealth – Healthcare Platform for Pregnant Women
Role: Full Stack Developer
Technology Stack:
Python, Django, Django REST Framework, React, PostgreSQL, Redis, Celery

Project Description:
Healthcare platform for managing doctors, patients, health records, pregnancy tracking, diet plans, exercise plans, and notifications.

Responsibilities:
- Developed backend APIs using Django REST Framework.
- Created React-based admin and doctor interfaces.
- Implemented user authentication and role-based access.
- Built patient management workflows.
- Developed health tracking modules.
- Integrated notification systems.
- Worked on database design and API optimization.

RoninFC – Combat Sports & Athlete Management Platform
Role: Backend Engineer (Primary Backend Owner)
Technology Stack:
Python, Django, DRF, PostgreSQL, React, Docker

Project Description:
Sports management platform for MMA championship operations including fighters, events, matches, rankings, payments, and notifications.

Responsibilities:
- Designed backend APIs for mobile and web applications.
- Developed admin management modules.
- Implemented fighter profiles and event workflows.
- Created API integrations for frontend applications.
- Worked on deployment and production configuration.

AI ENGINEERING EXPERIENCE

LLM Application Development
Experience with:
- Connecting applications with LLM APIs.
- Designing effective prompts.
- Building retrieval-based AI systems.
- Managing AI context and conversations.
- Creating AI-powered automation workflows.

SOFTWARE ENGINEERING EXPERIENCE

- REST API Architecture
- Database Design
- Backend Optimization
- Cloud Deployment
- System Design
- Production Debugging
- Agile Development
- Technical Documentation

KEY STRENGTHS

- Strong Python programming foundation.
- Backend engineering expertise.
- Practical Generative AI implementation knowledge.
- Ability to combine AI with production software systems.

- Experience building complete applications.
- Fast adoption of emerging technologies.

EDUCATION

Master Of Computer Application 10/2021
Sambhram Academy of Management Studies Bangalore
Bangalore City University

Bachelor Of Computer Application 05/2019
SJPN Trust's BCA College Nidasoshi Belagavi
RCU University

CAREER OBJECTIVE

To work as an AI Engineer / Generative AI Developer where I can combine my backend engineering experience and AI skills to build intelligent, scalable, and impactful AI-powered applications.
